PLEASE NOTE: depending on the car connectors you find behind the original radio, you must choose one of the two possible installation configuration.

CONFIGURATION "A"

Configuration "A" is standard.

ATTENTION!

In order to prevent ESD damage, the WHEEL REMOTE JACK must be connected before plugging in the connectors on car side.

Connect cables to the radio side as follow:

- 1- to ISO CONNECTORS (black and red housings)
- 2- to WIRED REMOTE SOCKET (NOTE: do not connect to microphone socket)
- 3- to SERVICES (if required); functions are marked on the wires:
Pink - Speed / Green - Parking

Connect cables to the car side as follow:

- 4- to CAR CONNECTOR

If configuration "B" is needed instead, unplug the SWC interface from the standard cable harness (configuration "A"), and plug in the cable harness of configuration "B".

CONFIGURATION "B"

ATTENTION!

In order to prevent ESD damage, the WHEEL REMOTE JACK must be connected before plugging in the connectors on car side.

Connect cables to the radio side as follow:

- 1- to ISO CONNECTORS (black and red housings)
- 2- to WIRED REMOTE SOCKET (NOTE: do not connect to microphone socket)
- 3- to SERVICES (if required); functions are marked on the wires:
Pink - Speed / Green - Parking / Blue - Antenna power lead

Connect cables to the car side as follow:

- 4- to CAR CONNECTOR

The steering wheel buttons perform the following functions (if supported by the radio and vehicle):

- 1- Volume +
- 2- Volume -
- 3- Accept incoming call
- 4- Reject incoming call
- 5- Preset down
- 6- Preset up
- 7- Source
- 8- Voice (if supported by radio and vehicle)
- Attenuate (if supported by radio and vehicle)

cut along the dotted line - copy for the vehicle owner
